

Huntington's Disease Support Group Springfield, Missouri

HDSA support groups offer many advantages! When families with similar concerns meet, a sense of community can arise. A support group can provide both an educational and therapeutic focus. Benefits include: * Ongoing support * Current research trials* Early access to medications showing effectiveness* Fundraising events* Community resources* Connections with other patients* Awareness of new and continuing research* Expert recommendations* Educational opportunities* Help in time of crisis.

You are invited to join us!
